

# Sunderland Contract Company

Company Profile

## About Us

Sunderland Contract is a company that was established in 2022 to meet the needs of customers in the field of air conditioning, central ventilation, and firefighting. The company is a pioneer in this vital field and always strives to provide the highest levels of quality and service. Being a modern company, Sunderland Contract stands out with a specialized and qualified team that possesses the necessary experience to design and install air conditioning, central ventilation, and firefighting systems with the highest safety and efficiency standards. We always aim to effectively meet the needs of our customers according to the latest technologies and industry practices. Our main mission is to provide safe and comfortable environments for our clients by offering customized and innovative solutions. Our vision reflects our commitment to sustainability and quality, as we strive for excellence and success in all the projects we undertake.

## Our Vision

We aspire to be the pioneering company in the field of air conditioning, central ventilation, and firefighting on a global level by providing innovative and sustainable systems that exceptionally meet the needs of our customers.

## Our Mission

We constantly strive to exceed the expectations of our customers and provide excellent service that ensures their complete satisfaction. We embrace modern technology and seek to reduce energy consumption and its impact on the environment.

## Our Goal

We aim to expand our activities and sustainably increase our business volume in the local and global markets by developing the skills of our employees and providing opportunities for continuous training and development to ensure the delivery of the best services.

## Our Values

Achieving the  
highest quality  
standards.

Sustainability  
in all  
our operations.

Building strong  
and sustainable  
relationships.

Achieving  
complete  
satisfaction of  
our customers

Commitment to  
integrity and  
transparency.

## Our Services

### Central Air Conditioning Installation and Maintenance

We design customized air conditioning systems to accurately meet the needs of our customers, such as multi-systems like DX (split system), variable refrigerant flow (VRF/VRV) systems, and water-cooled or air-cooled chiller systems. Also, we execute air conditioning systems with the highest levels of quality and efficiency, utilizing modern technology and high-quality materials to ensure excellent performance and sustainability of the systems. We also provide regular maintenance services and repairs for central air conditioning systems, ensuring their continuous operation and high efficiency.

### Central Ventilation Design and Installation

We design customized ventilation systems for buildings and facilities based on customer needs and specific requirements. We ensure the effective distribution of clean and fresh air throughout the building, and we work on implementing and installing central ventilation systems using the latest technologies and equipment. We guarantee the efficient operation of the systems and equal distribution of air.

## Firefighting

We specialize in designing firefighting systems for different buildings and facilities. This includes identifying various types of alarms, firefighting, automatic sprinklers, liquid systems, and other systems. We execute and install firefighting systems according to the highest quality and safety standards, utilizing modern equipment and materials to ensure the effectiveness of the systems in emergencies. We also provide regular maintenance services and comprehensive inspections for firefighting systems to ensure their efficient operation when needed.

## Pump Installation and Maintenance

We install various pumps for a wide range of applications, such as pumps used in cooling and heating systems, irrigation systems, and water supply systems. We ensure precise installation according to recognized standards and specifications. Additionally, we provide regular maintenance services and repairs for pumps to ensure optimal performance. This includes regular inspection, cleaning, replacement of damaged parts when necessary, and adjustment to ensure efficient operation.

## Ductwork

We design ductwork systems based on customer needs and project requirements. We prioritize the provision of suitable designs that ensure efficient air distribution inside buildings. We also focus on providing effective insulation for ductwork systems to maintain a stable temperature and distribute clean and healthy air within the building. We execute and manufacture ductwork systems in our specialized workshops with high quality, adhering to recognized standards. We strive to provide durable and reliable products.

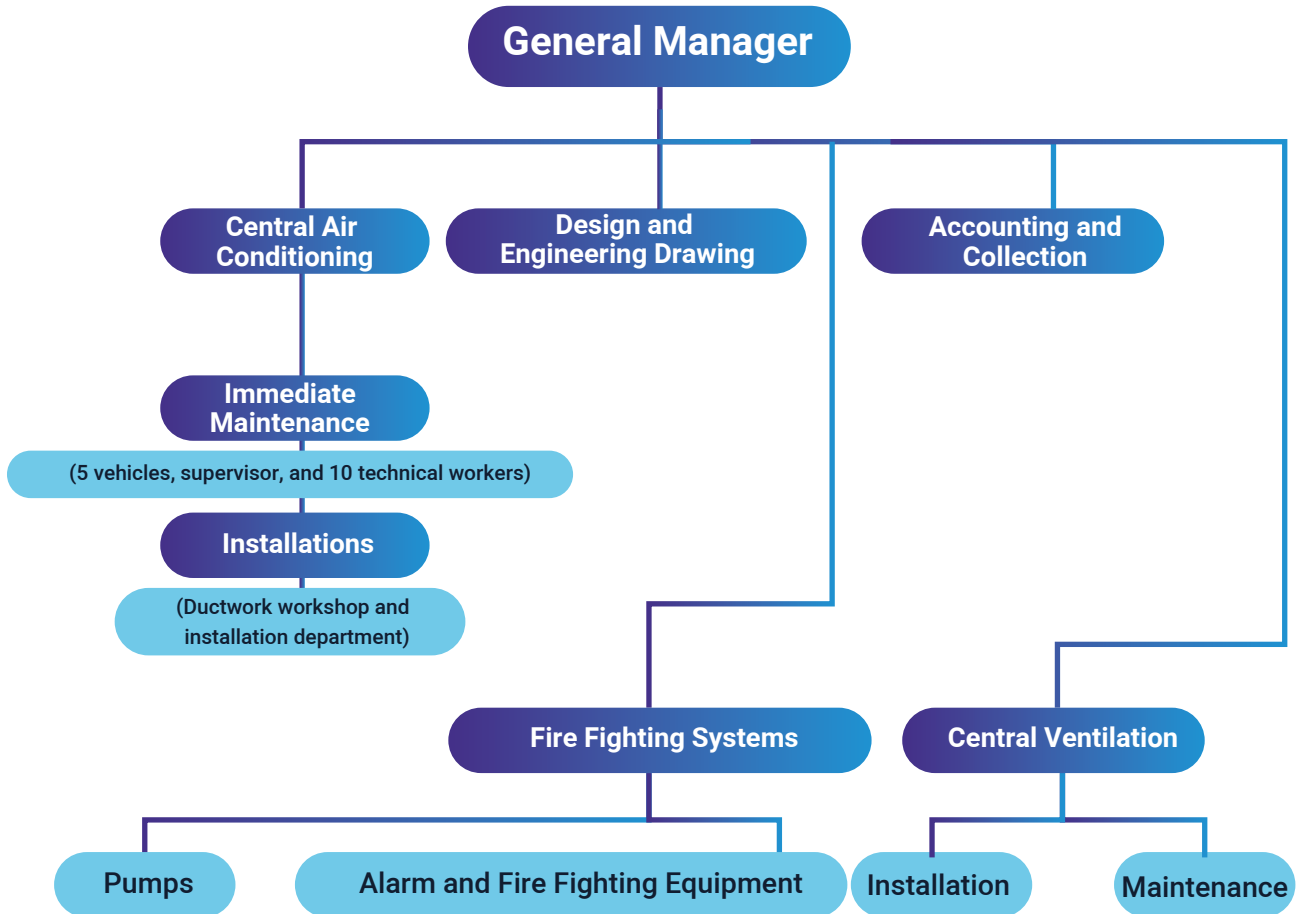

## Our Previous Projects/Portfolio

- **Central Air Conditioning Maintenance:** We have performed maintenance work on DX (split, package), VRF/VRV systems, and air-cooled or water-cooled chiller systems for villas, mosques, residential buildings, and government buildings in various areas of Kuwait.
- **Installation of various types of central air conditioning systems,** including design, ductwork, and commissioning.
- **Design and maintenance of firefighting systems.**
- **Maintenance of water pumps of various sizes.**
- **Installation of central ventilation systems.**

## Organizational Structure

## Our Partners

We are an authorized distributor for:

Carrier

Cooler

Mitsubishi

Clima

SKM

Rheem
